| <b>23.53</b>  | <b>17.63</b>  | <b>42.81</b> | <b>36.15</b>   |

#### Recommendations

**Immune system**

**Insufficiency**

**Liver**

**Hyperactivity**

The organ that is most often in the greatest insufficiency requires the greatest attention.  
 An organ in a state of hyperactivity is compensatory; your observation is recommended. As a rule, no action is required.  
 If you observe an organ metric below 15% for several days, you should consult a doctor.
